SOLAR

WHICH OPTION IS RIGHT FOR YOU?

Interested in solar energy?

YES

Do you have a roof?

YES

NO

Do you have access to land?

YES

NO

Is your roof suitable for solar panels?

NO

Do you qualify for solar financing?

YES

NO

YES

Are you able to afford up-front costs?

NO

There is a **30%**

Federal Tax Credit through 2032 plus additional state and regional incentives.

COMMUNITY SOLAR MAY BE RIGHT FOR YOU

If installing solar panels on your own property isn't an option for you, community solar is an option that allows you to subscribe to or "rent" solar from a shared solar farm or facility.

Participants receive a portion of the energy generated as well as potential cost savings, making it an accessible way to access clean, solar power without the need for individual installations.

Are you aware of the incentives offered?

NO

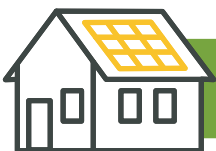

Did You Know...

Many solar experts say the average solar system pays for itself in eight to ten years, making your solar panels a great investment for your home!

YES
